ABOUT ME

Enthusiastic Front End Developer eager to contribute to team success through hard work, attention to detail, and excellent organizational skills.

- I have been working in Aerchain (SAAS based Company) as a Front End Dev for 1 Year and 7 Months, I have solely handled many modules,
- To name a few: Dashboard, login, Order Listing, Analysis, Customer/Supplier onboarding Form, Settings, Audit Activity Logs, and Templates. Using JavaScript, React, and Libraries like Material UI, Ant Design, Tanstack, and AgGrid Tables
- Apart from this, I have integrated Language Localization and Internationalization into our system. so it made it possible to access our web app in any language the user desires.
- I worked with a team of 3 on setting up AWS and Zero Down Time during Deployment also integrated Chatbot Widget - Front end side into our system

EXPERIENCE

SDE- 1 | Aerchain

July 2022 – Present

Bangalore, India

- Designed and implemented web applications along with 3rd-party software integrations (Chatbot, Language Localization, and Internationalization) as a web team liaison for all inter-departmental and customer-facing projects.
- Participated in the entire lifecycle of 2 projects/month from drafting a technical specification to releasing in production, and everything in between.
- Handled conversion of class components to functional components throughout the system and build 100% reusable components
- Managed team of Interns, overseeing onboarding, training, and professional growth of Interns.

SDE- Intern | Aerchain

Aug 2021 – June 2022

Bangalore, India

- Assisted in building beautiful user interfaces for the company and built interactive, React apps that could scale with both, increase in interaction complexity and volume.
- Used react component libraries to build excellent UI like Material UI, Ant Design, Tanstack, AgGrid, and many more.
- Have a good experience with component-based architecture designs
